

Aberdeen Global - Select Emerging Markets Bond Fund

A Acc USD

Performance Data and Analytics to 31 August 2018

Important Information

- The Fund invests in fixed interest securities issued by corporations and/or government related bodies in emerging markets.
- The Fund invests in emerging markets which tend to be more volatile and is subject to higher political, regulatory, credit and liquidity risks.
- The Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Credit risk reflects the ability of a bond issuer to meet its obligations.
- The Fund has a significant position in high-yielding bonds, which means a higher risk to investor's capital and income.
- Investment in this fund may involve a high degree of risk and may not be suitable for all investors. It is possible that the entire value of the Investment could be lost.
- Investors are responsible for their investment decisions and should ensure that the intermediary has advised on fund's suitability and consistency with their investment objective. If in doubt, please seek independent financial and professional advice.
- Investors should not invest in this Fund based solely on this document and should read the relevant offering documents (particularly the investment policies and risk factors) for more details before investing.

Investment objective

To achieve long-term total return by investing at least two-thirds of the Fund's assets in fixed interest securities which are issued by corporations with their registered office in and/or government related bodies domiciled in an Emerging Market country.

Cash includes cash on call, cash used as margin, fixed deposits, unrealised profit/losses on derivative positions and forward currency contracts. Where bonds are split-rated between two or more of Moody's, S&P and Fitch, the data shown takes a conservative approach, splitting lower. This may not be consistent with the arrangement detailed in the prospectus, which may detail taking a higher rating where there is a split. In the absence of any agency ratings an Internal Fund Manager rating may be applied. Figures may not always sum to 100 due to rounding.

*Yield to Maturity (YTM) is the internal rate of return earned on the underlying bonds based on the current price if they are held to maturity, assuming that all interest payments and principal payments are made on schedule. The calculation of YTM makes into account the current market price, par value, coupon and time to maturity. YTM is an estimation of future return, as the rate at which coupon payments can be reinvested when received is unknown. Yield to Maturity does not represent the performance of the Fund.

**The fund's Yield is calculated on annualised basis. Yield = (Gross annualised income/gross mid-market fund value) - most recent on-going charge%. A positive yield does not imply a positive return of the fund.
