- The Fund may be subject to risks, such as investment, equities and equity-related securities, fixed income securities, interest rate, credit and downgrading of investment grade securities, counterparty, currency risks and the risks of investing in small and mid-capitalisation companies and convertible bonds.
- The Fund's investment may be concentrated in Asia and the value of the Fund may be more volatile. Investment in emerging markets may involve increased risks including liquidity, currency/currency control, political and economic uncertainties, legal and taxation, settlement, custody, and volatility risks.
- The Fund may invest in derivatives for investment or efficient portfolio management purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
- Dividends may be paid out of capital gains and/or gross income while charging all or part of its fees and expenses to capital at the discretion of the Managers. This would effectively represent paying dividend out of capital, resulting in an increase in distributable income, and therefore amount to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
- Investors may suffer substantial loss of their investments in the Fund.

Investment Objectives¹

The Fund is aimed specifically, but not exclusively, at meeting the investment requirements of Hong Kong-based retirement schemes and its investment objective and policies have been tailored accordingly, namely, to achieve a long-term annualised rate of return of 2% per annum in excess of Hong Kong wage inflation when measured in Hong Kong dollar terms. In order to deliver against the desired objective, the Fund will hold a diversified portfolio of Asia, international equity markets and fixed income securities. Investment may also be made in cash and money market instruments where considered appropriate in light of market conditions.
