

BEA Union Investment Asian Bond and Currency Fund

As at 29 March 2019

Retail Hotline: (852) 3608 0321 | www.bea-union-investment.com

- BEA Union Investment Asian Bond and Currency Fund (the "Fund") invests in emerging markets, which are subject to higher liquidity and volatility risks.
- The Fund may invest in lower-rated fixed income instruments, including below investment grade and non-rated debt securities, which are subject to greater credit and liquidity risks than higher-rated securities.
- The manager may at its discretion make distributions from income and/or capital in respect of the distributing classes of the Fund. Investors should note that the distributions paid out of capital amount to a return or withdrawal of part of the unitholder's original investment or from any capital gains attributable to that original investment. Such distribution may result in an immediate reduction of the net asset value per unit.
- In terms of currency hedged class units, adverse exchange rate fluctuations between the base currency of the Fund and the class currency of the currency hedged class units may result in a decrease in return and/or loss of capital for unitholders. Over-hedged or under-hedged positions may arise and there can be no assurance that these currency hedged class units will be hedged at all times or that the manager will be successful in employing the hedge.
- Investors may invest in RMB (Hedged) units. It should be noted that the RMB is currently not a freely convertible currency as it is subject to foreign exchange control policies of the Chinese government. There is also no assurance that the RMB will not be subject to devaluation. Any devaluation of the RMB could adversely affect the value of investors' investments. There is no guarantee that the hedging strategy will be effective and investors may still be subject to the RMB currency exchange risk.
- The Fund may enter into futures contracts and currency forward contracts for hedging and investment purposes. Given the leverage effect embedded in futures and currency forward contracts, the Fund may be exposed to significant losses.
- Investors should not make an investment decision based solely on this material.
