

Performance, Top Holdings, Portfolio Breakdowns and Characteristics, and Net Assets as at 31-Oct-2017. All other data as at 09-Nov-2017.

**IMPORTANT:**

- The Fund invests in debt securities that are subject to both actual or perceived downgrading. The Fund may be affected by changes in prevailing interest rates and by credit quality considerations. The Fund may invest in non-investment grade bonds which may subject the Fund to higher default, volatility and liquidity risks. The Fund invests in certain emerging markets that may be subject to additional risks arising from political, economic and market factors. The Fund also invests in bonds issued or guaranteed by governments or authorities which may involve political, economic, default, or other risks, and in turn have an adverse impact on the Fund. The Fund's investments are concentrated in Asia excluding Japan. This may result in greater volatility than more broad-based investments.
- **Class 6 Shares** pay dividends gross of expenses or from capital at the Directors' discretion. **Class 8 Shares** pay dividends gross of expenses and include interest rate differential arising from share class currency hedging or pay dividends from capital at the Directors' discretion. Negative interest rate differentials may decrease the dividends paid, and in extreme cases may deduct from capital. Paying dividends gross of expenses may result in more income being available for distribution; however these shares of the Fund may effectively pay dividends from capital. Dividends paid from capital may amount to a partial return or withdrawal of an investor's original investment or capital gains. All declared dividends result in an immediate reduction in the NAV price of the share class on the ex-dividend date.
- The Fund may use derivatives to hedge market and currency risk and for efficient portfolio management. However, derivatives will not be extensively or primarily used for investment purposes. In an adverse situation, the Fund may suffer significant losses from their derivatives usage for hedging and efficient portfolio management.
- The value of a Fund can be volatile and could go down substantially within a short period of time. It is possible that the certain amount of your investment could be lost.
- Investors should not only base on this marketing material alone to make investment decision.

The Fund may invest in the full spectrum of available securities, including non-investment grade. The currency exposure of the Fund is flexibly managed.
