- The Fund may be subject to risks, such as investment, interest rate, credit and downgrading, counterparty, and currency risks. The Fund invests principally in sub-investment grade securities, and is subject to lower creditworthiness and higher default, liquidity and volatility risks than investment grade securities. The Fund may also invest in emerging markets which involve additional risks, including liquidity risks, lower standards of corporate governance, political and higher volatility.
- The Fund may invest in derivatives for investment purposes. Such investments may result in higher volatility or a significant loss in the Fund's assets within a short period of time.
- Dividends may be paid out of unrealized capital gains and/or gross income while paying all or part of the fees and expenses of the Fund out of capital resulting in an increase in distributable income at the discretion of the Managers. These would effectively represent paying dividend out of capital which amount to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund.
- Investors may suffer substantial loss of their investments in the Fund.

Investment Objectives¹

The primary investment objective of the Fund is to produce a high level of current yield in dollar terms, commensurate with an acceptable level of risk as determined by the Managers in their reasonable discretion. Any capital appreciation will be incidental. The policy of the Fund is to invest in a combination of debt and loan securities (including credit linked securities) of corporations and governments (including any agency of government or central bank) of any member state of the Organisation for Economic Co-operation and Development ("OECD") and of any developing or emerging markets.
