

1. This is an equity fund.
2. Investing in this fund may expose investors to market, liquidity, volatility, exchange and developing countries risks as well as to risk of small and medium companies. Share price and currency volatility are generally higher in developing markets. The use of financial derivative instruments for hedging and efficient portfolio management purposes may lead to exposure to credit risk of the issuer.
3. The investment focus of the fund might give rise to increased risk over more diversified funds.
4. The value of the fund can be extremely volatile and could go down substantially within a short period of time. It is possible that your investment value could suffer substantial loss.
5. The investment decision is yours, but you should not invest in the product unless the intermediary who sells it to you has advised you that the product is suitable for you and explained why including how buying it would be consistent with your investment objective.
