In no event shall MSCI, its affiliates or any MSCI data provider have any liability of any kind in connection with the MSCI data or the Fund described herein. Copying or redistributing the MSCI data is strictly prohibited.  
 The Fund's benchmark was changed from Custom 65% MSCI World + 35% JP Morgan Global Government Bond Index to Custom 65% MSCI ACWI + 35% JP Morgan Global Government Bond Index on 31 July 2017 to better represent the Fund's investable universe.

Past performance is not an indicator or a guarantee of future performance.  
**Distribution Yield:** The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class:  $(nr/p) \times 100$ . r = last dividend paid; p = month end NAV; n = distribution frequency. n = 12 for monthly distribution; n = 4 for quarterly distribution; n = 1 for yearly distribution.

**Top 10 Holdings:** These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.  
**Average Credit Quality:** The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions and unrated securities are not reflected in the ACQ.  
**Blended Yield:** A blended measure used for balanced funds. The blended yield is the market-weighted average of the current yield of the fund's fixed income component and the dividend yield of the fund's equity component. This measure is gross of fees. Holdings of the same issuer have been combined.  
**Asset Allocation/Composition of Fund:** Due to rounding, the sum of portfolio may not equal 100%.
