Risk Considerations

- The Fund may invest in emerging market securities which are exposed to higher risk of economic, political and regulatory changes that may pose additional risk to the Fund.
- The Fund's value may be affected by exchange control regulations and changes in exchange rates.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital.
- Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
- Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- This investment involves risks which may result in loss of part or entire amount of your investment.
- Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.
- Investors should not only base on this marketing material alone to make investment decisions.

*Explanatory Notes

Performance: Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Distribution Yield: The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class: $(nr/p) \times 100$. r = last dividend paid; p = month end NAV; n = distribution frequency. n = 12 for monthly distribution; n = 4 for quarterly distribution; n = 1 for yearly distribution.

Fund Management: In the case of portfolio managers who are CFA Charterholders, CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

Top 10 Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Dividend Yield: Reported as a weighted average to reflect the proportion of the portfolio each stock holding represents. This is the ratio of a stock's dividend per share to the month end market price.

Asset Allocation/Composition of Fund: Due to rounding, the sum of portfolio may not equal 100%.
