### Risk Considerations

- The Fund may invest in emerging market securities which are exposed to higher risk of economic, political and regulatory changes that may pose additional risk to the Fund.
- The Fund may invest up to 100% of their total net assets in structured products, mortgage- and asset-backed securities and derivatives (such as credit default swaps, forwards and options), and is subject to significant liquidity and counterparty default risks.
- The Fund may invest in defaulted debt securities on which the issuers are not currently making interest payment, and as a result may be subject to liquidity and counterparty default risks.
- The Fund may invest in non-investment grade debt securities, and as a result may be subject to liquidity and counterparty default risks.
- The Fund's value may be affected by exchange control regulations and changes in exchange rates.
- The Fund may invest extensively in financial derivative instruments for hedging purposes as well as investment purposes which may expose the Fund to the potential for significant losses and as a result may be subject to counterparty and volatility risk.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital.
- Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
- Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- This investment involves risks which may result in loss of part or entire amount of your investment.
- Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.
- Investors should not only base on this marketing material alone to make investment decisions.

\*Explanatory Notes

**Performance:** Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.  
**Morningstar Category™:** Copyright © Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is provided for reference purposes only. Past performance is not an indicator or a guarantee of future performance.  
**Distribution Yield:** The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class:  $(nr/p) \times 100$ . r = last dividend paid; p = month end NAV; n = distribution frequency. n = 12 for monthly distribution; n = 4 for quarterly distribution; n = 1 for yearly distribution.

Past performance is not an indicator or a guarantee of future performance.  
**Average Credit Quality:** The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.  
**Asset Allocation/Composition of Fund:** Due to rounding, the sum of portfolio may not equal 100%.
