

For Hong Kong Investors only

JPMorgan Multi Income Fund Unit Trust Range

July 2017

- The Fund invests in a diversified portfolio of income-producing equities, bonds and other securities. The Fund will have limited RMB denominated underlying investments.
- The Fund is therefore exposed to a range of investment related risks which includes equity, credit, investment grade bond risks, interest rate risk which may affect the price of bonds and real estate market related risks (associated with the risk of investing in REITs and other property related securities; direct investment in real estate is not permitted), liquidity, distribution (no assurance on distribution, distribution rate or dividend yield) and Eurozone sovereign debt crisis risks. Pertaining to investments in below investment grade or unrated debt securities, these securities may be subject to higher liquidity risks and credit risks comparing with investment grade bonds, with an increased risk of loss of investment. For currency hedged classes, risks associated with the hedging and class currency. For RMB hedged class, risks associated with the RMB currency and currency hedged classes risks. RMB is currently not freely convertible and RMB convertibility from offshore RMB (CNH) to onshore RMB (CNY) is a managed currency process subject to foreign exchange control policies of and restrictions imposed by the Chinese government. There can be no assurance that RMB will not be subject to devaluation at some point. The Manager may, under extreme market conditions when there is not sufficient RMB for currency conversion and with the approval of the Trustee, pay redemption monies and/or distributions in USD.
- Where the income generated by the Fund is insufficient to pay a distribution as the Fund declares, the Manager may at its discretion determine such distributions may be paid from capital including realised and unrealised capital gains. Investors should note that the payment of distributions out of capital represents a return or withdrawal of part of the amount they originally invested or from any capital gains attributable to that original investment. Any payments of distributions by the Fund may result in an immediate decrease in the net asset value per unit.
- Investors may be subject to substantial losses.
- Investors should not solely rely on this document to make any investment decision.

INVESTMENT OBJECTIVE

To maximize the income return primarily through investing in a diversified portfolio of income producing equities, bonds and other securities. In addition, the Fund aims to provide medium to long term moderate capital growth. The Manager will seek to achieve these objectives by active asset allocation to, and within, different asset classes and geographies. The asset classes include but are not limited to investment grade bonds, below investment grade bonds, high yield bonds, emerging market bonds, convertible bonds, real estate investment trusts ("REITs") and equities.
