

Schroder ISF - Asia Pacific Cities Real Estate A Acc

施羅德環球基金系列 - 亞太城市房地產股票 A類股份 累積單位

Important Information 重要事項

The fund invests primarily in equity and equity related securities of Asia Pacific real estate companies.

- The fund invests in securities principally engaged in real estate industry which may be influenced by the real estate capital market and increase in interest rates.
- The fund invests in concentrated region/sector and subjects to higher level of risks than a fund investing in a more diversified portfolio/strategy.
- The fund invests in the PRC and may subject to political and economic, liquidity and volatility, currency and exchange and PRC taxation consideration risks.
- The fund may use derivatives to meet its investment objective but does not intend to use derivatives extensively for investment purposes. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.
- For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.
