Fund Overview

Base Currency for Fund	USD
Total Net Assets (USD)	652 million
Fund Inception Date	01.06.1994
Number of Issuers	77
Benchmark	Custom 65% MSCI ACWI + 35% JP Morgan Global Government Bond Index
Morningstar Category™*	USD Moderate Allocation
Distribution Yield* – A (Qdis) USD	3.00%

Summary of Investment Objective

The Fund seeks capital appreciation and current income by investing principally in equity securities and government debt securities issued by entities throughout the world, including emerging markets. The portfolio manager anticipates that the majority of the Fund's portfolio is normally invested in equity or equity-linked securities.

Risk Considerations

- Templeton Global Balanced Fund invests principally in equity, equity-related securities and debt securities in any country.
- The Fund is subject to market risk, equity risk, emerging markets risk, interest rate securities risk, credit risk, sovereign debt risk, foreign currency risk, eurozone risk, liquidity risk, valuation risk, value stocks risk, convertible securities risk, derivative instruments risk, counterparty risk, volatility risk and securities lending risk.
- Emerging markets may involve increased risks and special considerations not typically associated with investment in more developed markets. The risks of investing in emerging markets, which can adversely affect and/or result in a substantial loss to the Fund, may include: liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- Security lending may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investment involves risks which may result in loss of part or entire amount of your investment. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you. Investors should not only base on this marketing material alone to make investment decisions.

Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Duration, Average Weighted Maturity and Blended Yield reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

Important Information

Unless stated otherwise, all information is as of the publishing date of this document. Source: Franklin Templeton.

Franklin Templeton Investments (Asia) Limited is the issuer of this document. This document is neither an offer nor solicitation to purchase shares of the fund; applications for shares may only be made on forms of application available with the Offering Documents. Investments are subject to investment risks, fund value may go up as well as down and past performance is not an indicator or a guarantee of future performance. The investment returns are denominated in fund currency. Investors investing in funds denominated in non-local currency should be aware of the risk of exchange rate fluctuations that may cause a loss of principal. Investors should read carefully the Offering Documents (including the section 'Risk Considerations') for the relevant risks associated with the investment in the fund before investing. Distribution of this document may be restricted in certain jurisdictions. This document does not constitute the distribution of any information or the making of any offer or solicitation by anyone in any jurisdiction in which such distribution or offer is not authorized or to any person to whom it is unlawful to distribute such a report or make such an offer or solicitation. This document has not been reviewed by the Securities and Futures Commission of Hong Kong.

*Explanatory Notes

Performance: Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

All MSCI data is provided "as is." The Fund described herein is not sponsored or endorsed by MSCI. In no event shall MSCI, its affiliates or any MSCI data provider have any liability of any kind in connection with the MSCI data or the Fund described herein. Copying or redistributing the MSCI data is strictly prohibited.

The Fund's benchmark was changed from Custom 65% MSCI World + 35% JP Morgan Global Government Bond Index to Custom 65% MSCI ACWI + 35% JP Morgan Global Government Bond Index on 31 July 2017 to better represent the Fund's investable universe.

Morningstar Category™: Copyright © Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is provided for reference purposes only. Past performance is not an indicator or a guarantee of future performance.

Distribution Yield: The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class: $(nr/p) \times 100$. r = last dividend paid; p = month end NAV; n = distribution frequency. $n = 12$ for monthly distribution; $n = 4$ for quarterly distribution; $n = 1$ for yearly distribution.

Fund Management: In the case of portfolio managers who are CFA Charterholders, CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

Top 10 Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). For unrated bonds ratings may be assigned based on the ratings of the issuer or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Blended Yield: A blended measure used for balanced funds. The blended yield is the market-weighted average of the current yield of the fund's fixed income component and the dividend yield of the fund's equity component. This measure is gross of fees. Holdings of the same issuer have been combined.

Asset Allocation/Composition of Fund: Due to rounding, the sum of portfolio may not equal 100%.
