**Offering Documents**

**Risk Considerations**

- Templeton Global Bond Fund invests principally in debt securities of any quality issued by governments and government-related entities worldwide.
- The Fund is subject to debt securities risk, market risk, credit risk, foreign currency risk, concentration risk, volatility risk and emerging markets risk.
- Investors should read the offering documents for details and the risk factors, in particular those associated with investments in emerging markets.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investment involves risks which may result in loss of part or entire amount of your investment. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you. Investors should not only base on this marketing material alone to make investment decisions.

### Portfolio Data Derivatives Disclosures

Market value figures reflect the trading value of the investments. Notional exposure figures are intended to estimate the portfolio's exposure, including any hedged or increased exposure through certain derivatives held in the portfolio (or their underlying reference assets). Average Duration, Average Weighted Maturity and Yield to Maturity reflect certain derivatives held in the portfolio (or their underlying reference assets). Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of any derivatives, unsettled trades or other factors.

### Important Information

Unless stated otherwise, all information is as of the publishing date of this document. Source: Franklin Templeton.

Franklin Templeton Investments (Asia) Limited is the issuer of this document. This document is neither an offer nor solicitation to purchase shares of the fund; applications for shares may only be made on forms of application available with the Offering Documents. Investments are subject to investment risks, fund value may go up as well as down and past performance is not an indicator or a guarantee of future performance. The investment returns are denominated in fund currency. Investors investing in funds denominated in non-local currency should be aware of the risk of exchange rate fluctuations that may cause a loss of principal. Investors should read carefully the Offering Documents (including the section 'Risk Considerations') for the relevant risks associated with the investment in the fund before investing. Distribution of this document may be restricted in certain jurisdictions. This document does not constitute the distribution of any information or the making of any offer or solicitation by anyone in any jurisdiction in which such distribution or offer is not authorized or to any person to whom it is unlawful to distribute such a report or make such an offer or solicitation. This document has not been reviewed by the Securities and Futures Commission of Hong Kong.

### \*Explanatory Notes

**Performance:** Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

**Morningstar Category™:** Copyright © Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is provided for reference purposes only. Past performance is not an indicator or a guarantee of future performance.

**Distribution Yield:** The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class:  $(nr/p) \times 100$ .  $r$  = last dividend paid;  $p$  = month end NAV;  $n$  = distribution frequency.  $n = 12$  for monthly distribution;  $n = 4$  for quarterly distribution;  $n = 1$  for yearly distribution.

**Fund Management:** In the case of portfolio managers who are CFA Charterholders, CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

**Fund Measures:** The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio.

**Asset Allocation/Composition of Fund:** Due to rounding, the sum of portfolio may not equal 100%.
