b The balance of PDA and the administrative charge 3.5% of the balance of the PDA (if applicable) are included in the column of total surrender benefit and total death benefit.

### Remarks:

1. This amount is equivalent to the yearly premium divided by 1.04.
2. The balance of PDA includes the Prepayment Amount paid by Policy Owner and any interest accrued. Any amount held in the PDA is independent of the Policy, and will not be taken into account when calculating any benefit and total premium paid under the Policy. All requests for withdrawal of the Prepayment Amount will not be accepted except the Policy is being surrendered or claimed. The Beneficiary is not entitled to any amount held in the PDA.
3. If the Policy is cancelled within 21-day cooling-off period, FWD will refund the Prepayment Amount, in addition to the first year premium, without interest to Policy Owner. If the Policy is surrendered after 21-day cooling-off period and before the first Policy Anniversary, FWD will pay the guaranteed cash value to Policy Owner. In addition, FWD will return the balance of the PDA but apply an administrative charge of 3.5% of the balance of the PDA. Otherwise, only guaranteed cash value will be returned to Policy Owner if the policy is surrendered after the first Policy Anniversary.
4. Upon the death of the Insured before the first Policy Anniversary, the balance of the PDA, in addition to the death benefit of 110% of the first year premium, will be paid without administration charge. Otherwise, the amount received upon death will be 110% of the total premium paid.
5. Notional Amount is used to calculate the yearly premium and guaranteed cash value. Notional Amount will only be paid as maturity benefit if the policy is in force and the insured is alive at end of the 3<sup>rd</sup> Policy Year. It is not related to death benefit and FWD will not pay this amount upon the death of the Insured.
6. The guaranteed maturity return is calculated based on the actual paid amount (including first year premium and Prepayment Amount deposited into PDA) and the Notional Amount at maturity. This has reflected interest from the PDA.
7. The percentage has been rounded to two decimal places.
8. The guaranteed cash value falling between two Policy Anniversaries will be determined by FWD by prorating the guaranteed cash value as at last and next Policy Anniversaries. If the Policy Owner surrenders the Policy while it is in force before the Maturity Date, the Policy Owner will be paid the guaranteed cash value as surrender benefit.

#### **What are the key product risks?**

##### **Credit Risk**

This Product is an insurance policy issued by FWD. The application of this insurance product and all benefits payable under your Policy are subject to the credit risk of FWD. You will bear the default risk in the event that FWD is unable to satisfy its financial obligations under this insurance contract.

##### **Liquidity Risk**

This product is 3 year term insurance policy as determined starting from the policy effective date to the policy maturity date. The Policy contains value and, if you surrender your Policy in the early policy years or before its maturity date, the amount you get back may be considerably less than the first year premium and the Prepayment Amount you have paid. Any amount in the PDA is unable to be surrendered or returned to you unless the Policy is also cancelled, surrendered or otherwise terminated before the first Policy Anniversary. You should ensure that you intend to leave your Prepayment Amount in your PDA. Application of the Product may constitute the liquidity risk to your financial condition. You need to bear the liquidity risk associated with the Product.

##### **Exchange rate and currency risk**

The application of this Product with the policy currency denominated in a foreign currency is subject to that foreign currency’s exchange rate and currency risk. The foreign currency may be subject to the relevant regulatory bodies’ control (for example, exchange restrictions). If your home currency is different from the policy currency, please note that any exchange rate fluctuation between your home currency and the policy currency of this Product will have a direct impact on the amount of premium required and the value of benefit(s) to be received. For instance, if the policy currency of the insurance product depreciates substantially against your home currency, the potential loss arising from such exchange rate movement may have a negative impact on the benefits you receive from this Product and your burden of the premium payment.

##### **Inflation Risk**

The cost of living in the future may be higher than now due to the effects of inflation. Therefore, the benefits under this Policy may not be sufficient for the increasing protection needs in the future even if FWD fulfills all of its contractual obligations.

##### **Early Surrender Risk**

If you surrender your Policy in the early policy years or before its maturity date, the amount of the benefit and the balance of the PDA (if applicable) you will get back may be considerably less than the first year premium and Prepayment Amount you paid.

##### **Premium Payment Term**

The premium payment term of the Policy is 2 years. You must pay the Prepayment Amount at the time of policy application. At the first Policy Anniversary, FWD will automatically use the balance of the PDA to settle the second year premium.

##### **Termination conditions**

The Policy shall automatically end on the earliest of the following:

- (1) when the Insured dies;
- (2) the Maturity Date;
